MERN STACK

WEEK-2

1.DAY-1

There are two ways to add Bootstrap:

Using CDN links.
Downloading it.
Grid System:

Breakpoints
Container
Row
Column = Grid
Inside a container, we can place rows, and within a row, we can divide it into columns.

Bootstrap components I learned about:

Bootstrap containers
Bootstrap buttons
Bootstrap cards

2.DAY-4
REACT

npm i -g npm@latest

- Rules for Creating Components:
  The first letter of the component file name should be capitalized
  The file name and component name should be the same.
  In one file, you can create only one component.
- Key React Commands:
  To create a React file, use npx create-react-app file-name (run this in the terminal).
  To run the React app, use npm start.

- Types of Components:
  Functional component
  Arrow functional component
  Class component
